Dear Starr,

I'm writing to you today because I believe our community must urgently pass a building electrification policy and phase fossil fuels out of our homes and businesses.

Buildings are responsible for 13% of greenhouse gas emissions in the US, and children in homes with gas stoves face a 42% increased risk of asthma symptoms – that's on par with the risks from secondhand smoke. Burning gas in homes also generates harmful emissions of formaldehyde, methane, nitrogen oxides, and other pollutants.

As your constituent, I'm urging you to do everything in your power to pass a policy that will ensure new buildings in our community are all-electric and help phase gas and other fossil fuels out of existing buildings.

Thank you.

Sincerely,
Dana Petre-Miller, Keizer
