I am making a formal request that RV's no longer be allowed to park in driveways for extended periods.

My neighbor has currently had his new RV parked in his driveway for over three weeks.

While I consider it an eyesore, and potentially lowering property values, it also brings other problems.

First, because the RV is in the driveway, they cannot park their three cars there. Their large trucks and cars are constantly parked in front of other people's houses (often instead of their own). Their adult children and their friends do the same which leaves the rest of the neighborhood with little street parking for guests.

Having the RV in the driveway also results in their trash containers being constantly in view close to the street.

The neighbor across the street from me recently sold his house due to people not being respectful in the neighborhood (barking dogs, not mowing lawns, etc.) But I do not have the option of moving. I would not have moved into the neighborhood if there had been an RV parked next to me when we purchased our home.

I realize that Keizer is traditionally a small town. But as it is growing I believe some rules will need to change. We are hard working, law abiding citizens. And as Keizer grows, I know that is the kind of people we want to join our community.

Attached picture is the view from my lot.
