

CITY OF KEIZER
FLOODPLAIN/GREENWAY DEVELOPMENT
ADDITIONAL INFORMATION REQUIRED

The following information must be signed and sealed by a land surveyor, engineer, or architect authorized by law to certify elevation information.

Land elevation at the development site: _____ (USGS mean feet above sea level).

The Base Flood Elevation (BFE) at the point of most extreme flooding or extent of the Floodplain on the subject property: _____.

The elevation above sea level of:

1. Lowest floor elevation (including basements) of the proposed structure or development: _____.
2. Lowest floor elevation of any existing structures and developments: _____.
3. Proposed fill elevation: _____.

I Certify that the information represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

 Certifier's Name License No.

 Title Company Name

 Address City State Zip Code

- *If the proposed use or development is within the Floodway, as identified on the Federal Insurance Administration Flood Boundary and Floodway Map, a certification, by a registered professional engineer or architect, shall be required at the time the application is submitted stating that proposed encroachment into the floodway will not result in an increase in flood levels during a major flood. The certification shall include all the engineering data and calculations used to justify and support the certification.*
- Submit any additional information that can assist the Zoning Administrator in determining whether the proposed new use meets the applicable Floodplain and Greenway Ordinance. Such information could include flood-proofing and anchoring proposals, identification of unusual terrain features and statements, drawings or photos of the proposed external appearance of the proposed activity, as viewed from the river (if within the Greenway).
